

FLEXICAM

Router & CNC Machines

Stealth

* Available with Siemens Controller also.

Stealth

Model & Sizes :

1515	1524 x 1524
1525	1524 x 2540
1530	1524 x 3050
1540	1524 x 4080
2030	2040 x 3080
2040	2040 x 4080

Specifications :

Z axis Travel	: 200mm
Z axis Clearance	: 240mm
Maximum Speed	: 60m/min
Resolution X/Y	: 0.001
Resolution Z	: 0.001
Repeatability	: +/-0.01mm

FlexiCAM has taken the long successful line of Stealth routers and added extra value and performance to the 2017 edition. You get all the features you'd expect from a Stealth series plus larger AC servo motors, heavier bearings and rails, and newly modified carriage borrowed from our XXL series of routers all included as standard features. These upgrades create increased overall speed and stiffness translating to lower cost of operation, higher through put, less tool wear, and the best CNC Router available on the market. With a large selection of Automatic Tool Change spindles and vacuums, as well as options not available to comparable priced machines, such as Multiples Carriages, Floating Heads, and Rotary Machining, the new Stealth is Unmatched in its flexibility and performance. Stealth routers are available with Fanuc and siemens controller.

Router & CNC Machines

The Cheetah Series Digital Cutter is a multi-functional digital cutter that meets a variety of needs. It offers cutting, creasing and other options in one machine and can be completely configured based on your specific needs in terms of size and options. Thus giving you the flexibility of choosing what you want.

The ACS Control system offers high speed and accuracy. The LCD touch screen panel makes it easy to learn and operate. The digital cutter offers flexible tool module options that meet the requirements of diverse industries.

Models and Sizes

1530	1605 x 3135 mm
2030	2040 x 3135 mm
2040	2040 x 4080 mm

Specifications:

Z axis Travel	: 120mm
Z axis Clearance	: 120mm
Maximum Speed	: 70m/min (X/Y)
Resolution X/Y	: 0.001
Resolution Z	: 0.001
Repeatability	: +/-0.05mm

cheetah

Pike Series of CNC Routers is the newest addition to the FlexiCAM Family. Pike is an exceptional value for the money, offering rigid steel construction throughout. Our industry leading Siemens or ACS control system, AC Servo Motors and protected ball screw. The versatility of the machine offers cutting and engraving both in one machine. This system is great for a medium to heavy use environment, be it in the woodworking or industrial markets or configured with options such as Optical cut system for high speed sign making.

The Pike is designed to accommodate all popular sheet sizes, so no matter what industry you are in you are able to get a machine that fits your market, without needing to spend more money for a machine that it designed for a different industry. This series of machines comes standard with a 7.5hp manual spindle as standard, which can be upgraded to an 11hp Automatic Tool change Model.

Models and Sizes

1212	1250 x 1250 mm
1225	1250 x 2500 mm
1530	1580 x 3100 mm

Specifications:

Z axis Travel	: 280mm
Z axis Clearance	: 200mm
Maximum Speed	: 20m/min (X/Y)
Max speed in Y	: 32m/min
Resolution X/Y	: 0.001
Resolution Z	: 0.001
Repeatability	: +/-0.05mm
